PROFILE

I am an experienced Front-end Developer with a solid 2-years background in building mobile-first, fully responsive websites. My proficiency in HTML 5, SCSS(CSS3), and JavaScript has enabled me to deliver unique and user-friendly websites that are not just visually pleasing but also highly functional. I have a keen eye for detail and a deep understanding of user experience, which allows me to create websites that are tailored to the needs of my clients and their target audience.

SKILLS

- HTML 5, SCSS (CSS3) & JavaScript
- Github / git version control
- Figma / Photoshop
- Copywriting (CopyAI)

EXPERIENCE

Various Categories - *Web Developer*
10/09/2021 - 12/11/2021 | LONDON, UK

VariousCategories is an affiliate website that promotes other companies and products. The website was built using WordPress and Elementor page builder, offering a fully customizable and responsive design that effectively represents the brand and highlights its products. My role included building pages, customizing the website's appearance with CSS, editing images with Photoshop, and adding text and other content through Copy.AI - a tool that utilizes AI to generate written content. Additionally, I ensured that the website was fully responsive and mobile-friendly by adopting a mobile-first approach.

BAAE Company Ltd, The Gambia - *Web Developer*
01/01/2022 - 21/1/2022 | LONDON, UK

The BAAE Company website was built using WordPress and Elementor. My duties included customizing the design, incorporating custom CSS, editing images with Photoshop, and adding text and other content through Copy.AI which is a tool that uses AI to generate written content. Additionally, I ensured the website was fully responsive and mobile-friendly by using the mobile-first approach. I also made sure that the website is easy to navigate and provided all the relevant information for the customers.

Odel Allen Construction - *Web Developer*
02/02/2022 - 01/03/2022 | MONTEGO-BAY, JAMAICA

Odel Allen is a construction company based in Montego-Bay, Jamaica. I used WordPress and the Elementor website builder to create a custom website that accurately represents their brand and effectively highlights their services. My responsibilities included customizing the design, adding custom CSS, cropping, and editing images with Photoshop, and writing content with the Copy.AI tool. I tested the website on all browsers and devices to ensure it is accessible and fully responsive.

SupremeBoutiques - *Web Developer*
10/03/2022 - 30/03/2022 | LONDON, UK & BANJUL, THE GAMBIA

I constructed an Ecommerce website for SupremeBoutiques. The website was built using WordPress and the Elementor website builder. My responsibilities included incorporating custom CSS, editing images with Photoshop, and adding text and other content through Copy.AI, a tool that uses AI to generate written content. Additionally, I ensured the website was fully responsive and mobile-friendly by using the mobile-first approach.

Style Nation - *Web Developer*
05/05/2022 - 30/06/2022 | LONDON, UK

I had the opportunity to work on a project for Style Nation, a salon located in Reading, UK. The goal was to create a custom website theme that accurately represented their brand and effectively highlighted their services in a visually pleasing and user-friendly way. To accomplish this, I employed my knowledge and skills in HTML 5, SCSS(CSS3), and JavaScript to develop a responsive theme using mobile-first principles. This methodology ensured that the website would offer a seamless experience for users across all devices, including mobile phones and tablets.

AIG Investment - *Web Developer*
10/10/2022 - 12/01/2023 | LONDON, UK

I built a website for AIG Investment using WordPress and the Elementor website builder. My responsibilities included customizing the design, adding custom CSS, cropping images using Photoshop, and adding text and other content using Copy.AI, a tool that utilizes AI to generate written content. Additionally, I ensured that the website was fully responsive and mobile-friendly by utilizing a mobile-first approach. I paid close attention to the details and made certain that the website was easy to navigate and provided all the necessary information for the customers.
